Investors are requested to note that, under the aforesaid Option, the amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. Instruments	Indicative allocations (% of net assets)		Risk Profile High/Medium/Low
	Minimum	Maximum	
Equity & Equity Related Securities (unhedged)#	10%	40%	Medium to High
Equities, equity related instruments and derivatives including index futures, stock futures, index options, & stock options, etc. as partly hedged / arbitrage exposure#	65%	90%	Medium to High
Debt and Money Market Instruments	10%	35%	Low to Medium
Units issued by REITs and InvITs	0%	10%	Medium to High

Investments in Derivatives – upto 90% of the net assets of the scheme.

Investments in Securities Lending – upto 20% of its net assets of the scheme (where not more than 5% of the net assets of the scheme will be deployed in securities lending to any single counterparty).

In accordance with SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010, the aggregate asset allocation will not exceed 100% of the net assets of the scheme.

The scheme does not intend to invest in overseas/foreign securities or participate in repo/ reverse repo transactions in corporate debt securities or engage in short selling or in Equity Linked Debentures or participate in credit default swap transactions.

Pending deployment of funds of the Scheme, in securities in terms of the investment objective, the AMC may park the funds of the scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.

At all times the portfolio will adhere to the overall investment objective of the scheme.

If suitable arbitrage opportunities are not available then the fund manager may hedge the equity long position. However, if the debt / money market instruments are providing more efficient returns than equity exposure then the fund manager may choose to have a lower equity arbitrage/hedge exposure. In such defensive circumstances the asset allocation will be as per the below table:

Instruments	Indicative Allocation (% of total assets)		Risk Profile High/Medium/Low
	Minimum	Maximum	
Equity & Equity Related Securities (unhedged)#	10%	25%	Medium to High
Equities, equity related instruments and derivatives including index futures, stock futures, index options, & stock options, etc. as partly hedged / arbitrage exposure#	25%	65%	Medium to High
Debt and Money Market Instruments	35%	65%	Low to Medium

Investments in Derivatives – upto 65% of the net assets of the scheme.

Investments in Securities Lending – upto 20% of its net assets of the scheme (where not more than 5% of the net assets of the scheme will be deployed in securities lending to any single counterparty).

In accordance with SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010, the aggregate asset allocation will not exceed 100% of the net assets of the scheme.

The scheme does not intend to invest in overseas/foreign securities or participate in repo/ reverse repo transactions in corporate debt securities or engage in short selling or in Equity Linked Debentures or participate in credit default swap transactions.

Pending deployment of funds of the Scheme, in securities in terms of the investment objective, the AMC may park the funds of the scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.

At all times the portfolio will adhere to the overall investment objective of the scheme.

Please refer the Scheme Information Document (SID) of the Scheme for further details.

INVESTMENT STRATEGY : The scheme will follow a combination of unhedged Equity exposure of high conviction stocks along with arbitrage opportunities between spot and futures prices of exchange traded equities and the arbitrage opportunities available within the derivative segment. If suitable arbitrage opportunities are not available in the opinion of the Fund Manager, the scheme may hedge the unhedged equity exposure against broader market indices with balance being invested in debt and money market securities. However, if the debt / money market instruments are providing more efficient

returns than equity exposure then the fund manager may choose to have a lower equity arbitrage/hedge exposure.

The fund manager will evaluate the difference between price of a stock in the futures market and in the spot market. If the price of a stock in the futures market is higher than in the spot market, after adjusting for cost and taxes, the scheme may buy the stock in the spot market and sell the same stock in equal quantity in the futures market simultaneously.

The investment team shall also scan the market for opportunities and shall evaluate the individual companies on their merits, leading to the bottom-up investment decision.

The fund manager shall use derivatives within the permissible limits actively in-addition to hedging and rebalancing the portfolio.

The fund manager could also use active cash calls as a means to rebalance or hedge the portfolio upto the permissible limits.

The Scheme may also invest in the units of REITs and InvITs for diversification, subject to conditions prescribed by SEBI from time to time.

RISK PROFILE OF THE SCHEME : Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. For summarized Scheme Specific Risk Factors please refer to page 38 for details.

UNION LIQUID FUND

NAME OF THE SCHEME: Union Liquid Fund

TYPE OF THE SCHEME : An Open-ended Liquid Scheme. A relatively low interest rate risk and moderate credit risk.

INVESTMENT OBJECTIVE : To provide reasonable returns commensurate with lower risk and high level of liquidity through a portfolio of money market and debt securities. However, there can be no assurance that the investment objective of the scheme will be achieved.

ASSET ALLOCATION PATTERN OF THE SCHEME : Under normal circumstances, the asset allocation pattern under the Scheme will be as follows:

Type of Instruments	Normal Allocation (% of Net Assets)
Money market and debt instruments with residual maturity upto 91 days (including floating rate debt instruments, securitized debt, mutual fund units of debt schemes)*	Minimum 0%–Maximum 100%

*Investments in securitized debt including Pass Through Certificates (PTCs) not to exceed 25% of the net assets of the Scheme as at the time of purchase.

Pursuant to SEBI circular No SEBI/IMD/CIR No. 13/150975/09 dated January 19, 2009, the Scheme shall make investments only in debt and money market instruments with maturity of up to 91 days.

Explanation:

- In case of securities where the principal is to be repaid in a single payout, the maturity of the securities shall mean residual maturity. In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of the security.
- In case of securities with put and call options (daily or otherwise) the residual maturity of the securities shall not be greater than 91 days.
- In case the maturity of the security falls on a Non-business Day, then settlement of securities will take place on the next Business Day.

The total debt derivative exposure will be restricted to 50% of the net assets of the Scheme. The Scheme shall not invest in equity derivatives. Investment in derivatives shall be for hedging, portfolio balancing and such other purposes as may be permitted from time to time.

The cumulative gross exposure through debt and derivative positions will not exceed 100% of the net assets of the scheme. For further details, refer point on 'Limitations and restrictions for investments in derivatives' in the Scheme Information Document.

Presently, the Scheme does not intend to invest in overseas/ foreign securities or engage in stock lending and short selling.

Please refer to the SID of the Scheme for further details.

INVESTMENT STRATEGY : To achieve the investment objective of the Scheme, investments will be made in an appropriate mix of high quality money market, debt and Government securities. The AMC will be guided by fundamental research and analysis, ratings assigned by domestic credit rating agencies, macroeconomic factors. In addition, the investment team of the AMC will carry out an internal in-depth credit evaluation of securities proposed to be invested in. The credit evaluation will essentially be a bottom up approach and include financial statement analysis, the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer, prospects of the industry.

The investment team of the AMC will continuously monitor and review the macroeconomic environment including the political and economic factors, money supply in the system, Government borrowing programme and demand and supply of debt instruments, credit pick up among others, affecting the liquidity and interest rates.

The composition of the Indian Debt market (both the primary and secondary) is dominated by money market instruments in the short end of the yield curve and by medium and long term bonds and debentures in the long end of the curve. Since the scheme seeks to deliver reasonable market related returns with lower risk, the investment strategy will be to predominantly invest in money market instruments.

As the turnover of the portfolio would be high, given the fact the investors in liquid fund would deploy their funds for a short period of time, the portfolio would be structured to incorporate high liquidity by the use of cash and cash equivalents.

Please refer to the Scheme Information Document (SID) of the Scheme for complete details.

RISK PROFILE OF THE SCHEME : Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. For summarized Scheme Specific Risk Factors please refer to page 38 for details.

UNION DYNAMIC BOND FUND

NAME OF THE SCHEME: Union Dynamic Bond Fund

TYPE OF THE SCHEME : An open ended dynamic debt scheme investing across duration. A relatively high interest rate risk and moderate credit risk.

INVESTMENT OBJECTIVE : The investment objective of the Scheme is to actively manage a portfolio of good quality debt as well as money market instruments so as to provide reasonable returns and liquidity to the investors.

However, there can be no assurance that the investment objective of the scheme will be achieved.

ASSET ALLOCATION PATTERN OF THE SCHEME : Under normal circumstances, the asset allocation pattern under the Scheme will be as follows:

Types of Instruments	Normal Allocation (% of Net Assets)
Debt* Instruments including Government Securities and Corporate Debt.	Minimum 0% - Maximum 100%
Money Market Instruments	Minimum 0% - Maximum 100%
Units issued by REITs and InvITs	Minimum 0% - Maximum 10%

*Investments in securitized debt including Pass Through Certificates (PTCs) not to exceed 25% of the net assets of the Scheme as at the time of purchase.

The Scheme retains the flexibility to invest across all classes of debt and money market instruments with no cap or floor on maturity, duration or instrument type concentrations. The Fund will dynamically manage the portfolio maturity profile based on the current market condition. Since, the intention of the Scheme is to dynamically manage the asset allocation, the percentages of asset allocation would change depending on view on interest rates as well as the level of corporate spreads prevailing at the time of investment and also the availability of different assets at different point of time.

The total debt derivative exposure will be restricted to 50% of the net assets of the Scheme. The Scheme shall not invest in equity derivatives. Investment in derivatives shall be for hedging, portfolio balancing and such other purposes as may be permitted from time to time.

In accordance with SEBI Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010, the aggregate asset allocation will not exceed 100% of the net assets of the scheme.

Presently, the Scheme does not intend to invest in foreign securities or engage in stock lending and short selling.

Pending deployment of the funds as per the investment objective of the Scheme, the funds of the Scheme may be parked in short term deposits of the scheduled commercial banks, subject to the guidelines and limits specified by SEBI from time to time.

Please refer to the Scheme Information Document (SID) of the Scheme for further details.

INVESTMENT STRATEGY : The Scheme retains the flexibility to invest across all classes of debt and money market instruments with no cap or floor on maturity, duration or instrument type concentrations. The portfolio maturity profile of the Scheme will be actively managed based on the prevailing market conditions like interest rate scenario, market liquidity, available spreads etc., whereby the maturity profile will be increased or decreased with a view to enhance income/returns.

Since, the intention of the Scheme is to dynamically manage the asset allocation, the percentages of asset allocation would change depending on view on interest rates as well as the level of corporate spreads prevailing at the time of investment and also the availability of different assets at different point of time.

The Scheme has the discretion to take aggressive interest rate / duration risk calls, which could mean investing the entire net assets in long dated Government securities and debt instruments (carrying relatively higher interest rate risk), or on defensive considerations, entirely in money market instruments. Accordingly, the interest rate risk of the Scheme may change substantially depending upon the Fund's call.

To achieve the investment objective of the Scheme, investments will be made in an appropriate mix of high quality money market, debt and Government securities. The AMC will be guided by fundamental research and analysis, ratings assigned by domestic credit rating agencies, macroeconomic factors. In addition, the investment team of the AMC will carry out an internal in-depth credit evaluation of securities proposed to be invested in. The credit evaluation will essentially be a bottom up approach and include financial statement analysis, a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer, prospects of the industry.

The investment team of the AMC will continuously monitor and review the macroeconomic environment including the political and economic factors, money supply in the system, Government borrowing programme and demand and supply of debt instruments, credit pick up among others, affecting the liquidity and interest rates.

The Scheme may also invest in the units of REITs and InvITs for diversification, subject to conditions prescribed by SEBI from time to time.

Please refer to the SID of the Scheme for complete details.

UNION ARBITRAGE FUND

NAME OF THE SCHEME: Union Arbitrage Fund

TYPE OF THE SCHEME : An open ended scheme investing arbitrage opportunities

INVESTMENT OBJECTIVE : The investment objective of the scheme is to generate capital appreciation and income by predominantly investing in arbitrage opportunities in the cash and derivatives segment of the equity market, and by investing the balance in debt and money market instruments.

However, there is no assurance that the Investment Objective of the scheme will be achieved.

ASSET ALLOCATION PATTERN OF THE SCHEME : Under normal circumstances, the asset allocation pattern will be as follows:

Instruments	Indicative allocations (% of net assets)		Risk Profile High/Medium/Low
	Minimum	Maximum	
Equity and Equity related instruments (as part of hedged / arbitrage exposure)*	65%	90%	Medium to High
Debt and Money Market Instruments including margin money deployed for derivatives transactions	10%	35%	Low
Units issued by REITs and InvITs	0%	10%	Medium to High

*Equity allocation so built, at any point in time, would be completely hedged out, using derivative instruments that provide an equal but opposite exposure, thereby making the net exposure market-neutral. In case the fund is not able to have a net market-neutral position due to any operational reason such as short delivery in the cash market etc., the fund will endeavor to rebalance the portfolio to a net market-neutral position at the earliest.

Investment in Securitised Debt - Nil

Investments in Derivatives – upto 90% of the net assets of the scheme.

Investments in Securities Lending – upto 20% of its net assets of the scheme (where not more than 5% of the net assets of the scheme will be deployed in securities lending to any single counterparty).

In accordance with SEBI Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010, the cumulative Gross exposure through equity, debt and derivative positions will not exceed 100% of the net assets of the scheme.

The scheme does not intend to invest in overseas/foreign securities or participate in repo/ reverse repo transactions in corporate debt securities or engage in short selling or in Equity Linked Debentures or participate in credit default swap transactions.

Pending deployment of funds of the Scheme, in securities in terms of the investment objective, the AMC may park the funds of the scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.

At all times the portfolio will adhere to the overall investment objective of the scheme.

Under defensive circumstances, the asset allocation will be as per the below table:

Instruments	Indicative Allocation (% of total assets)		Risk Profile High/Medium/Low
	Minimum	Maximum	
Equity and Equity related instruments (as part of hedged / arbitrage exposure)*	0%	65%	Medium to High
Debt and Money Market Instruments including margin money deployed for derivatives transactions	35%	100%	Low

*Equity allocation so built, at any point in time, would be completely hedged out, using derivative instruments that provides an equal but opposite exposure, thereby making the net exposure market-neutral. In case the fund is not able to have a net market-neutral position due to any operational reason such as short delivery in the cash market etc., the fund will endeavor to rebalance the portfolio to a net market-neutral position at the earliest.

Defensive circumstances are when the arbitrage opportunities in the market place are negligible or returns through arbitrage opportunities are lower than alternative investment opportunities as per asset allocation pattern. The asset allocation under defensive considerations will be made keeping in view the interest of the unitholders.

Investment in Securitised Debt – Nil

Investments in Derivatives – upto 65% of the net assets of the scheme.

Investments in Securities Lending – upto 20% of its net assets of the scheme (where not more than 5% of the net assets of the scheme will be deployed in securities lending to any single counterparty).

In accordance with SEBI Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010, the cumulative Gross exposure through equity, debt and derivative positions will not exceed 100% of the net assets of the scheme.

The scheme does not intend to invest in overseas/foreign securities or participate in repo/ reverse repo transactions in corporate debt securities or engage in short selling or in Equity Linked Debentures or participate in credit default swap transactions.

Pending deployment of funds of the Scheme, in securities in terms of the investment objective, the AMC may park the funds of the scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.

At all times the portfolio will adhere to the overall investment objective of the scheme.

Please refer the Scheme Information Document (SID) of the Scheme for further details.

INVESTMENT STRATEGY : The scheme will endeavour to invest in arbitrage opportunities between spot and futures prices of exchange traded equities and the arbitrage opportunities available within the derivative segment as per the investment objective and the asset allocation pattern of the Scheme. If suitable arbitrage opportunities are not available in the opinion of the Fund Manager, the scheme may predominantly invest in debt and money market securities.

The fund manager will evaluate the difference between price of a stock in the futures market and in the spot market. If the price of a stock in the futures market is higher than in the spot market, after adjusting for cost and taxes, the scheme may buy the stock in the spot market and sell the same stock in equal quantity in the futures market simultaneously.

The Scheme will endeavor to build similar market neutral positions that offer an arbitrage potential for e.g. buying the basket of index constituents in the cash or futures segment and selling the index futures, etc. The Scheme would also look to avail of opportunities between one futures contract and another.

The fund manager shall use derivatives within the permissible limits actively in-addition to hedging and rebalancing the portfolio subject to the Regulations and the investment objectives and the terms of the scheme set out elsewhere in the Scheme Information Document of the Scheme.

The fund manager could also use active cash calls as a means to rebalance or hedge the portfolio upto the permissible limits.

The Scheme may also invest in the units of REITs and InvITs for diversification, subject to conditions prescribed by SEBI from time to time.

RISK PROFILE OF THE SCHEME : Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. For summarized Scheme Specific Risk Factors please refer to page 38 for details.

RISK MITIGATION STRATEGIES : The asset allocation of the Scheme will be steadily monitored and it shall be ensured that investments are made in accordance with the scheme objective and within the regulatory and internal investment restrictions prescribed from time to time. A detailed process has been designed to identify measure, monitor and manage portfolio risk.

INVESTMENT OBJECTIVE: The investment objective of the Scheme is to generate returns by investing in Debt and Money Market Instruments with overnight maturity.

However, there is no assurance that the Investment Objective of the scheme will be achieved.

ASSET ALLOCATION PATTERN OF THE SCHEME: Under normal circumstances, the asset allocation pattern will be as follows:

Instruments	Indicative allocations (% of net assets)		Risk Profile High/Medium/Low
	Minimum	Maximum	
Debt and Money Market Instruments maturing on or before the next Business Day (including Tri-party Repo and equivalent)	0%	100%	Low

The scheme intends to invest substantially in Tri – Party Repo. There could also be circumstances when the Scheme is entirely invested in Tri-Party Repo based on the Fund Manager's discretion or when other securities with overnight maturity are not available.

The scheme does not intend to invest in securitized debt, derivatives, overseas/foreign securities or engage in stock lending or short selling or participate in credit default swap transactions.

The scheme intends to invest in repo /reverse repo transactions in corporate debt securities, as per prevailing regulatory norms.

In accordance with SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/683 dated December 10, 2021, the Scheme may deploy, not exceeding 5% of the net assets of the Scheme in G-secs and/or T-bills with a residual maturity of upto 30 days for the purpose of placing the same as margin and collateral for certain transactions. It may be noted that the aforesaid deployment by the Scheme in G-secs and/or T-bills with a residual maturity of upto 30 days shall be in partial modification of SEBI circular no. SEBI/HO/IMD/DF3/CIR/P/2017/114 dated October 6, 2017 and the asset allocation of the Scheme which specifies that the investments made by the Scheme shall be in securities maturing on or before the next business day.

The cumulative gross exposure in Debt and Money Market Instruments shall not exceed 100% of the net assets of the Scheme.

In case of securities where the principal is to be repaid in a single payout, the maturity of the securities shall mean residual maturity. In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of the security. In case the maturity of the security falls on a Non-business Day, then settlement of securities will take place on the next Business Day.

At all times the portfolio will adhere to the overall investment objective of the scheme.

Please refer the Scheme Information Document (SID) of the Scheme for further details.

INVESTMENT STRATEGY: The investment objective of the Scheme is to generate returns by investing in Debt and Money Market Instruments with overnight maturity. The Scheme will invest in debt securities and money market instruments maturing on or before next Business Day. The Scheme intends to invest substantially in Tri – Party Repo. There could also be circumstances when the Scheme is entirely invested in Tri-Party Repo based on the Fund Manager's discretion or when other securities with overnight maturity are not available. For risks relating to investments in Tri – Party Repo, please refer to the section on 'Risks associated with investing in Securities Segment and Tri-party Repo trade settlement' in this document. The Scheme may invest in funds (where the underlying securities are debt and Money Market Instruments maturing on or before the next business day) in conformity with the investment objective of the Scheme.

The investment team of the AMC will continuously monitor and review the macroeconomic environment including the political and economic factors, money supply in the system, Government borrowing programme and demand and supply of debt instruments, credit pick up among others, affecting the liquidity and interest rates.

RISK PROFILE OF THE SCHEME: Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. For summarized Scheme Specific Risk Factors please refer to page 38 for details.

RISK MITIGATION STRATEGIES: The asset allocation of the Scheme will be steadily monitored and it shall be ensured that investments are made in accordance with the scheme objective and within the regulatory and internal investment restrictions prescribed from time to time. A detailed process has been designed to identify measure, monitor and manage portfolio risk.

Some of the risks and the corresponding risk mitigating strategies are listed below:

Risk	Risk mitigation strategy
Interest rate risk Security price volatility due to movements in interest rate.	Periodically evaluate the portfolio structure with respect to existing interest rate scenario. As the Scheme would invest in overnight securities, interest rate risk would be relatively minimal.
Business Risk Risk related to uncertainty of income caused by the nature of a company's business and having an impact on price fluctuations.	Portfolio companies carefully selected to include those with perceived good quality of earnings. As the Scheme would invest in overnight securities, business risk would be limited.
Credit Risk Risk that the issuer may default on interest and/or principal payment obligations.	Investment universe carefully defined to include issuers with high credit quality; critical evaluation of credit profile of issuers on an on-going basis.
Performance Risk Risk arising due to changes in factors affecting debt markets.	Endeavour to have a portfolio of securities having adequate liquidity with overnight maturity.
Concentration Risk Risk arising due to over exposure to few securities/issuers/sectors. The Scheme intends to invest substantially in Tri – Party Repo. There could also be circumstances when the Scheme is entirely invested in Tri-Party Repo based on the Fund Manager's discretion or when other securities with overnight maturity are not available.	Ensuring diversification by investing across the spectrum of securities/issuers/sectors to the extent feasible. Since the Scheme intends to invest substantially in Tri – Party Repo, concentration risk relating to investments in Tri – Party Repo would persist. However, Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. For details, please refer to the section on 'Risks associated with investing in Securities Segment and Tri-party Repo trade settlement' in this document.

Risk	Risk mitigation strategy
Liquidity Risk Risk associated with saleability of portfolio securities	Control portfolio liquidity at portfolio construction stage. As the Scheme would invest in overnight securities, liquidity risk would be relatively minimal.
Market Risk Risk arising due to adverse market movements	Endeavour to have a portfolio of securities having adequate liquidity with overnight maturity. As the Scheme would invest in overnight securities, market risk would be relatively minimal.

1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct	Direct Plan

4	Mentioned	Direct	Direct Plan
5	Direct	Not Mentioned	Direct Plan
6	Direct	Regular	Direct Plan
7	Mentioned	Regular	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

#The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration can be calculated as follows:

$$\text{Macaulay Duration} = \frac{\sum_{t=1}^n \frac{t \cdot C}{(1+y)^t} + \frac{n \cdot M}{(1+y)^n}}{\text{Current Bond Price}}$$

Where:

- t = respective time period
- C = periodic coupon payment
- y = periodic yield
- n = total number of periods
- M = maturity value
- Current Bond Price = Present value of cash flows

The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond.

The Scheme may also invest in the units of REITs and InvITs for diversification, subject to conditions prescribed by SEBI from time to time.

Please refer the Scheme Information Document (SID) of the Scheme for further details.

A detailed process has been designed to identify measure, monitor and manage portfolio risk.

Active duration management strategy; Control portfolio duration and actively evaluate the portfolio structure with respect to existing interest rate scenario. *Pursuant to SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2019/101 dated September 20, 2019, Union Liquid Fund shall not invest in debt securities having structured obligations (SO rating) and/or credit enhancements (CE rating). However, debt securities with government guarantee shall be excluded from such restriction.

Applicable only to Union Focused Fund:

The Scheme seeks to generate long term capital appreciation by investing in equity and equity related instruments (investment in maximum 30 stocks across market capitalisation). This concentrated nature of the portfolio may result in higher levels of volatility vis-à-vis other diversified equity oriented schemes. Since the scheme will invest in not more than 30 stocks, it is also expected to have higher market liquidity risk compared to a regular diversified equity scheme.

Applicable only to Union Midcap Fund:

The Scheme seeks to achieve long term capital appreciation and generate income by investing predominantly in equity and equity related instruments of mid cap companies. While Mid Cap stocks give one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that Mid Cap stocks can be riskier and more volatile on a relative basis. The Scheme may also invest in equity and equity related securities of companies other than mid cap companies, debt and money market instruments and in Units issued by REITs and InvITs.

Applicable only to Union Medium Duration Fund:

Risks associated with investing in repo transactions in corporate bonds:

The market for the aforesaid product is illiquid. Hence, repo obligations cannot be easily sold to other parties. If a counterparty fails, the scheme would have to take recourse to the collateral provided. If a counterparty fails to repay and the value of the collateral falls beyond the haircut, then the Scheme would be exposed to a loss of interest or principal.

Risk factors applicable to all existing schemes

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with transaction in Units through stock exchange(s):

In respect of transaction in Units of the Scheme through BSE and / or NSE (applicable to the facility to transact in the Units of the Scheme through the Stock Exchange mechanism provided by the AMC), allotment and redemption of Units on any Business Day will depend upon the order processing /

settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange. The risks associated in regard to the segregated portfolio are as follows:

2) KYC COMPLIANCE WITH ANTI MONEY LAUNDERING (AML) REGULATIONS

In accordance with requirements under the Prevention of Money Laundering Act, 2002, (PMLA) the Rules issued there under and the guidelines and circulars on Anti-Money Laundering issued by SEBI, (collectively "AML Regulations"), mutual funds are required to formulate and implement Client Identification Programme to verify and maintain the record of identity and address(es) of investors. This is commonly referred to as 'Know Your Client' guidelines (KYC).

With a view to streamline implementation of KYC procedures and ensure compliance with the AML Regulations, the mutual fund industry had collectively put in place arrangement with an independent agency (CDSL Ventures Limited) that acted as central record keeping agency ('Central Agency'), and as Central Agency had the responsibility for collection of documents relating to identity and address of investors.

In order to avoid duplication of KYC process with every SEBI registered intermediary and with a view to bringing about uniformity in the KYC requirement and a mechanism for centralization of the KYC records in the securities market, SEBI has vide its various circulars and the SEBI (KYC Registration Agency) Regulations 2011, introduced common KYC across market intermediaries.

With effect from January 01, 2012 ("Effective Date"), SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries viz. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective Investment Schemes, etc.

Following are the KYC requirements for new / prospective investors and existing investors:

i. KYC requirements for new / prospective investors:

New / Prospective Investors are requested to use the common KYC Application Form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The KYC Application Forms are available on the website www.unionmf.com.

The Mutual Fund shall perform the initial KYC of its new investors and may also undertake enhanced KYC measures commensurate with the risk profile of its investors in line with the aforesaid circulars / Prevention of Money Laundering Act, 2002, and circulars thereto. The Mutual Fund shall upload the details of the investors on the system of the KYC Registration Agency (KRA). Registrar & Transfer Agent (RTA) of the Mutual Fund may also undertake the KYC of the investors on behalf of the Mutual Fund. On receipt of initial/updated KYC documents from the Mutual Fund, the KRA shall send a letter to the investor within SEBI prescribed timelines, confirming the details thereof.

It is mandatory for intermediaries including mutual funds to carry out In-Person Verification (IPV) of its new investors from the Effective Date. The IPV carried out by any SEBI registered intermediary can be relied upon by the Mutual Fund. The AMC and National Institute of Securities Markets (NISM)/Association of Mutual Funds in India (AMFI) certified distributors who are Know Your Distributor (KYD) compliant

are authorised to undertake the IPV for Mutual Fund investors. Further, in case of any applications received directly (i.e. without being routed through the distributors) from the investors, the Mutual Fund may rely upon the IPV (on the KYC Application Form) performed by the scheduled commercial banks.

Further, the Government of India has authorized the Central Registry of Securitization and Asset Reconstruction and Security interest of India (CERSAI), to act as, and to perform the functions of, the Central KYC (CKYC) Records Registry under the PML Rules 2005, including receiving, storing, safeguarding and retrieving the KYC records in digital form of a client, as defined in the Prevention of Money Laundering Act, 2002. Every reporting entity is required to capture the KYC information for sharing with the Central KYC Records Registry (CKYCR). Accordingly, the investors shall be required to provide requisite KYC information/ documents as prescribed by CERSAI and the AMC from time to time. Investors who have already completed CKYC and have a KYC Identification Number (KIN) can invest in the Mutual Fund by quoting the KIN and by submitting a self certified copy of PAN and by completing In-Person Verification (IPV) as mentioned above

ii. KYC requirements for existing investors:

Existing KYC compliant investors of the Mutual Fund can continue to invest as per the current practice. However, pursuant to SEBI circular no. MIRSD/ Cir-5 /2012 dated April 13, 2012 and subsequent SEBI communication, investors who had completed the erstwhile Centralised Mutual Fund KYC through CDSDL Ventures Limited, are required to provide KYC details and complete IPV as per the new KYC requirements, which was not mandated earlier.

It is mandatory for all categories of investors to be KYC compliant for any amount of investment.

AMC reserves the right to reject application forms for transactions in units of the Mutual Fund not accompanied by common KYC Application Form or letter/ acknowledgement issued by the KRA/KIN issued by CERSAI. The KYC compliance status of the investors will be validated with the records of the KRA/CERSAI. For units held in demat form the KYC performed by the Depository Participant of the applicants will be considered as KYC verification done by the Trustee/AMC. In relation to implementation of the SEBI Guidelines on identification of Beneficial Ownership, the AMC reserves the right to call for such information / documents from the investors that the AMC deems fit.

For further details, please refer to the Section on “Prevention of Money Laundering and Know Your Client (“KYC”) requirements” in the Statement of Additional Information (SAI).
